

Appl. No.: 10/715,094  
Amdt. dated 02/07/2006  
Reply to Official Action of November 7, 2005

Amendments to the Claims:

1. (Currently Amended) An application for communicating event reminders to a digital device, the application comprising a computer readable storage medium having computer-readable program instructions embodied in the medium, the computer-readable program instructions comprising:

first instructions for generating a calendar view that represents time in calendar format, and ~~associates for associating~~ events with respective periods of time; and

second instructions for generating an event reminder that is displayed in the calendar view, and ~~provides for providing communication of the event reminder to the digital device of the event reminder prior to the event, wherein the digital device comprises a media capture device adapted to capture media from a location of the event.~~

2. (Currently Amended) The application of Claim 1, wherein the second instructions further generates an event alert in response to instructions of the event reminder and communicates the event alert to the digital device at a time proximate the period of time associated with the event.

3. (Original) The application of Claim 1, wherein the second instructions for generating an event reminder further includes instructions for the event reminder to be communicated, internally, to a digital device.

4. (Original) The application of Claim 1, wherein the second instructions for generating an event reminder further includes instructions for the event reminder to be communicated, externally, to a remote digital device.

5. (Original) The application of Claim 2, wherein the second instructions further generates an event alert further includes instructions for the event alert to be communicated, internally, to a digital device.

Appl. No.: 10/715,094  
Amdt. dated 02/07/2006  
Reply to Official Action of November 7, 2005

6. (Original) The application of Claim 2, wherein the second instructions further generates an event alert further includes instructions for an event alert to be communicated, externally, to a remote digital device.

7. (Original) The application of Claim 1, wherein the second instructions for generating an event reminder further includes instructions for generating an event reminder that provides for a visual event reminder to be communicated to a digital device.

8. (Original) The application of Claim 1, wherein the second instructions for generating an event reminder further includes instructions for generating an event reminder that provides for an audible event alert to be communicated to a digital device.

9 (Original) The application of Claim 2, wherein the second instructions for generating an event alert further includes instructions for generating an event alert that provides for a visual event alert to be communicated to a digital device.

10. (Original) The application of Claim 2, wherein the second instructions for generating an event alert further includes instructions for generating an event alert that provides for an audible event alert to be communicated to a media capture device.

11. (Original) The application of Claim 1, further comprising third instructions for generating a digital media diary that provides for digital display of a media view in unison with the display of the calendar view, wherein the media view provides access to digital media files and associates digital media files with a period of time.

12. (Original) The application of Claim 11, wherein the third instructions for generating a digital media diary further provides for digital display of a timeline view that provides for scrolling of the media view and calendar view in relation to time.

Appl. No.: 10/715,094  
Amdt. dated 02/07/2006  
Reply to Official Action of November 7, 2005

13. (Currently Amended) A digital device, the device comprising:  
a processing unit that executes computer-readable program instructions for  
accessing media files, the computer-readable program instructions comprising:  
first instructions for generating a calendar view that represents time in  
calendar format, and ~~associates for associating~~ events with respective periods of time, and  
second instructions for generating an event reminder that is displayed in  
the calendar view, and ~~provides for providing communication of the event reminder to~~  
~~the a digital media capture device of the event reminder prior to the event, the digital~~  
~~media capture device being adapted to capture media from a location of the event;~~ and  
a display in communication with the processing unit that presents a display of the  
calendar view and media event reminder.

14. (Currently Amended) The digital device of Claim 13, wherein the second  
instructions further generates an event alert in response to instructions of the event reminder and  
communicates the event alert to the digital device ~~of the event alert at a time proximate the~~  
period of time associated with the event.

15. (Currently Amended) The digital device of Claim 13, wherein the digital device  
comprises the digital media capture device, and wherein the second instructions for generating an  
event reminder further includes instructions for the event reminder to be communicated,  
internally, to a the digital media capture device.

16. (Currently Amended) The digital device of Claim 13, wherein the second  
instructions for generating a media event reminder further includes instructions for the event  
reminder to be communicated, externally, to a remote digital media capture device.

17. (Currently Amended) The digital device of Claim 14, wherein the digital device  
comprises the digital media capture device, and wherein the second instructions further generates

Appl. No.: 10/715,094  
Amdt. dated 02/07/2006  
Reply to Official Action of November 7, 2005

an event alert further includes instructions for the event alert to be communicated, internally, to a the digital media capture device.

18. (Currently Amended) The digital device of Claim 14, wherein the second instructions further generates an event alert further includes instructions for an event alert to be communicated, externally, to a remote digital media capture device.

19. (Currently Amended) The digital device of Claim 13, wherein the second instructions for generating an event reminder further includes instructions for generating an event reminder that provides for a visual event reminder to be communicated to a the digital media capture device.

20. (Currently Amended) The digital device of Claim 13, wherein the second instructions for generating an event reminder further includes instructions for generating an event reminder that provides for an audible event alert to be communicated to a the digital media capture device.

21 (Currently Amended) The digital device of Claim 14, wherein the second instructions for generating an event alert further includes instructions for generating an event alert that provides for a visual event alert to be communicated to a the digital media capture device.

22. (Currently Amended) The digital device of Claim 14, wherein the second instructions for generating an event alert further includes instructions for generating an event alert that provides for an audible event alert to be communicated to a the digital media capture device.

23. (Original) The digital device of Claim 13, further comprising third instructions for generating a digital media diary that provides for digital display of a media view in unison

Appl. No.: 10/715,094  
Amdt. dated 02/07/2006  
Reply to Official Action of November 7, 2005

with the display of the calendar view, wherein the media view provides access to digital media files and associates digital media files with a period of time.

24. (Original) The digital device of Claim 13, wherein the third instructions for generating a digital media diary further provides for digital display of a timeline view that provides for scrolling of the media view and calendar view in relation to time.

25. (Currently Amended) A method for alerting a digital capture device of an event warranting media capture, the method comprising the steps of:

inputting an event reminder in a planner application that is implemented on a digital apparatus;

associating the planner application with one of more digital media capture devices; and

communicating an event alert from the digital apparatus to the one or more digital media capture devices at a time proximate to the event occurring, at least one of the one or more digital media capture devices being adapted to capture media from a location of the event.

26. (Currently Amended) The method of Claim 25, wherein the step of communicating an event alert from the digital apparatus to the one or more digital media capture devices at a time proximate to the event occurring further comprises communicating an event alert from the digital apparatus to an internal digital media capture device disposed within the digital apparatus prior to the event occurring.

27. (Currently Amended) The method of Claim 25, wherein the step of communicating an event alert from the digital apparatus to the one or more digital media capture devices at a time proximate to the event occurring further comprises communicating an event alert from the digital apparatus to one more external digital media capture devices prior to the event occurring.

Appl. No.: 10/715,094  
Amdt. dated 02/07/2006  
Reply to Official Action of November 7, 2005

28. (Currently Amended) The method of Claim 27, wherein the step of communicating an event alert from the digital apparatus to the one more external digital media capture devices at a time proximate to the event occurring further comprises communicating, via wireless telecommunication, an event alert from the digital apparatus to one more external digital media capture devices prior to the event occurring.

29. (Original) The method of Claim 27, wherein the step of communicating an event alert from the digital apparatus to the one more external digital media capture devices prior to the event occurring further comprises communicating, via short-range wireless connectivity, an event alert from the digital apparatus to one more external digital media capture devices prior to the event occurring.

30. (Original) The method of Claim 25, wherein the step of communicating an event alert from the digital apparatus to the one or more digital media capture devices prior to the event occurring further comprises communicating, repeatedly, an event alert from the digital apparatus to one or more digital media capture devices from a predetermined time prior to the media event up until the occurrence of the event.

31. (Original) The method of Claim 25, further comprising the step of activating, automatically, the one or more digital capture devices upon receipt of the event alert.

32. (Original) The method of Claim 25, further comprising the step of converting the event reminder to metadata information.

33. (Original) The method of Claim 32, further comprising the step of correlating the metadata information with a media file associated with the event.

34. (Original) The method of Claim 32, further comprising the step of associating the metadata information with a captured media file.

Appl. No.: 10/715,094  
Amdt. dated 02/07/2006  
Reply to Official Action of November 7, 2005

35. (Original) The method of Claim 33, further comprising the step of presenting at least a portion of the metadata information and a representation of the media file in a media view associated with a media diary application.

36. (Currently Amended) A method for reminding a digital capture device of an event warranting media capture, the method comprising the steps of:

inputting an event reminder in a planner application that is implemented on a digital apparatus;

associating the planner application with one of more digital media capture devices; and

communicating an event reminder from the digital apparatus to the one or more digital media capture devices prior to the event occurring, at least one of the one or more digital media capture devices being adapted to capture media from a location of the event.

37. (Original) The method of Claim 36, wherein the step of communicating an event reminder from the digital apparatus to the one or more digital media capture devices prior to the event occurring further comprises communicating an event reminder from the digital apparatus to an internal digital media capture device disposed within the digital apparatus prior to the event occurring.

38. (Original) The method of Claim 36, wherein the step of communicating an event reminder from the digital apparatus to the one or more digital media capture devices prior to the event occurring further comprises communicating an event reminder from the digital apparatus to one more external digital media capture devices prior to the event occurring.

39. (Original) The method of Claim 38, wherein the step of communicating an event reminder from the digital apparatus to the one more external digital media capture devices prior to the event occurring further comprises communicating, via wireless telecommunication, an

event reminder from the digital apparatus to one more external digital media capture devices prior to the event occurring.

40. (Original) The method of Claim 38, wherein the step of communicating an event reminder from the digital apparatus to the one more external digital media capture devices prior to the event occurring further comprises communicating, via short-range wireless connectivity, an event reminder from the digital apparatus to one more external digital media capture devices prior to the event occurring.

41. (Original) The method of Claim 36, wherein the step of communicating an event reminder from the digital apparatus to the one or more digital media capture devices prior to the event occurring further comprises communicating, repeatedly, an event reminder from the digital apparatus to one or more digital media capture devices from a predetermined time prior to the media event up until the occurrence of the event.

42. (New) The apparatus of Claim 1, wherein the second instructions provide communication of the event reminder to a media capture device comprising at least one of a camera, video recorder and audio recorder.

43. (New) The digital device of Claim 13, wherein the second instructions provide communication of the event reminder to a media capture device comprising at least one of a camera, video recorder and audio recorder.

44. (New) The method of Claim 25, wherein the step of communicating an event alert comprises communicating an event alert from the digital apparatus to at least one digital media capture device comprising at least one of a camera, video recorder and audio recorder.

45. (New) The method of Claim 36, wherein the step of communicating an event reminder comprises communicating an event reminder from the digital apparatus to at least one

Appl. No.: 10/715,094  
Amdt. dated 02/07/2006
